

Prompt: Evaluating test acceptance criteria and release risks

The screenshot displays the Amazon Bedrock Playground interface. At the top, the 'Mode' is set to 'Chat'. A 'Compare mode' toggle is active, and a 'Build' button is visible. Below this, two model outputs are shown side-by-side for the prompt 'Evaluating test acceptance criteria and release risks'.

Model	Input Tokens	Output Tokens	Latency (ms)
Nova Pro	7	512	4946
Nova 2 Lite	103	2380	14904

The output for Nova Pro is a single line: 'Evaluating test acceptance criteria and release risks'. The output for Nova 2 Lite is a single line: 'Evaluating test acceptance criteria and release risks'. Below the outputs, a text box contains the instruction: 'Write a prompt. Press Shift + Enter to add a new line. Press Enter to generate a response.' A 'Run' button is located at the bottom right of the text box.

On the left side of the interface, a sidebar shows the 'Amazon Bedrock' navigation menu with sections: Discover (Overview, Quickstart, Model catalog, API keys), Labs (Quotas, Compare models), and Test (Playground, Watermark detection). The 'Playground' option is selected under the 'Test' section.

Nova Pro

Input tokens: 7

Output tokens: 512

Latency: 4946 ms

Nova 2 Lite

Input tokens: 103

Output tokens: 2380

Latency: 14904 ms

Nova Lite

Input tokens: 7

Output tokens: 512

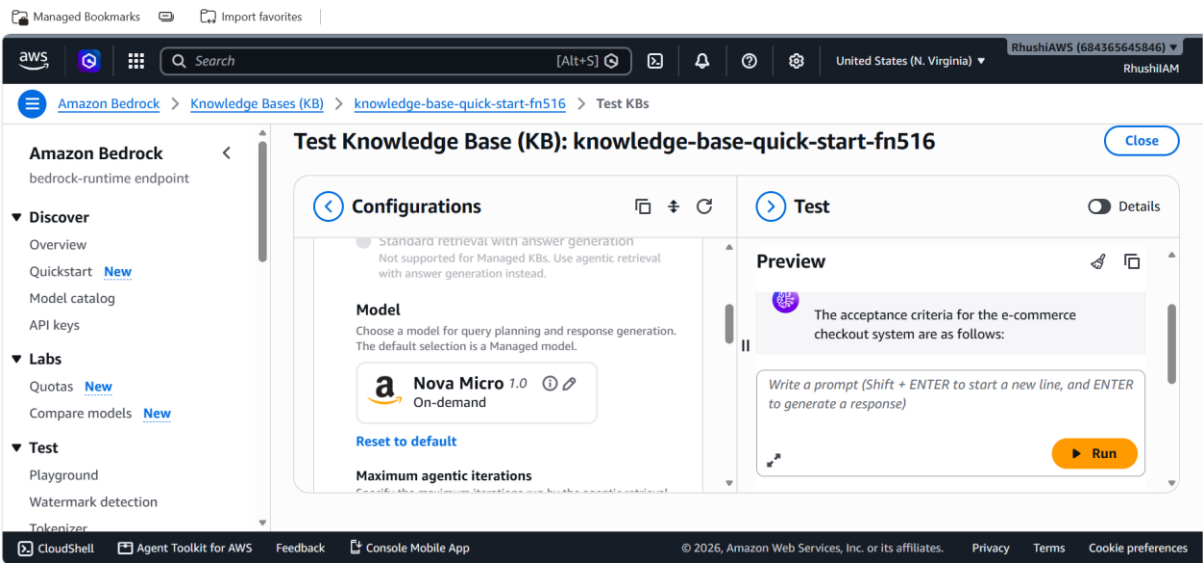

Latency: 3089 ms

Nova Micro

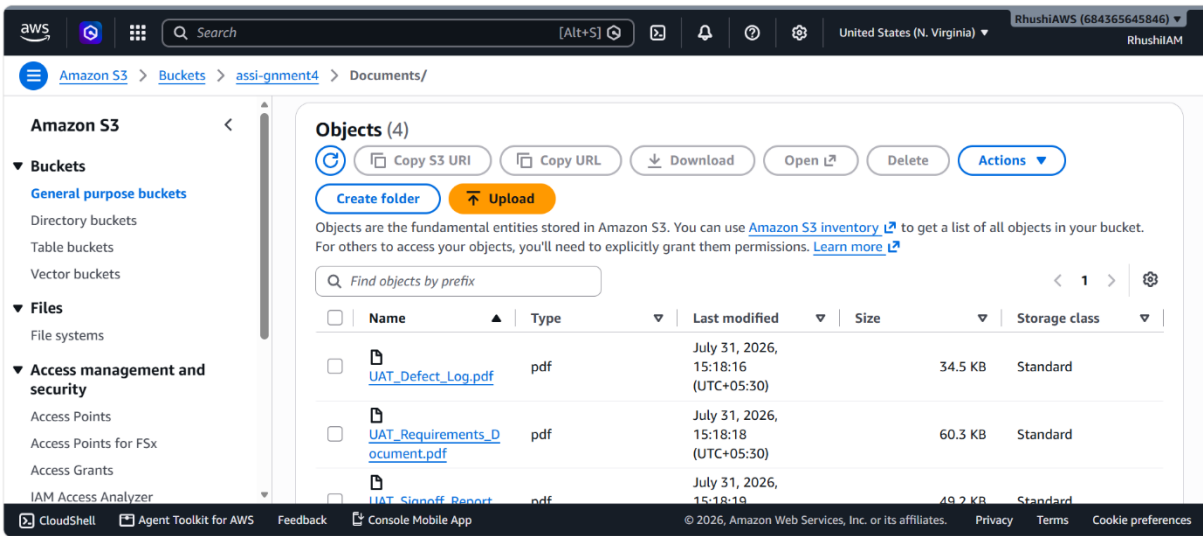

Input tokens: 7

Output tokens: 512

Latency: 1563 ms
